MILES LEFT TO GO

SUBMIT YOUR MILES

IN AN EFFORT TO PROMOTE PHYSICAL ACTIVITY WHILE LEARNING ABOUT SPACE, the students at Teton Elementary are trying to *race to the moon*. Each month we will be learning about different aspects of the moon and participating in activities and experiments related to these topics. The moon is approximately 238,857 miles from Earth. If our 130 students were to accomplish this alone, each child would have to cover 1,837 miles, which is why we are asking for donated miles to reach this goal. Any time you bike, run, walk, or swim, please visit this website and enter your name and miles below. We would like to have participants from all over the world so we can incorporate Geography into our activities. Please tell your friends, wherever they may be, to donate miles as well. Thank you!
